UX Flow

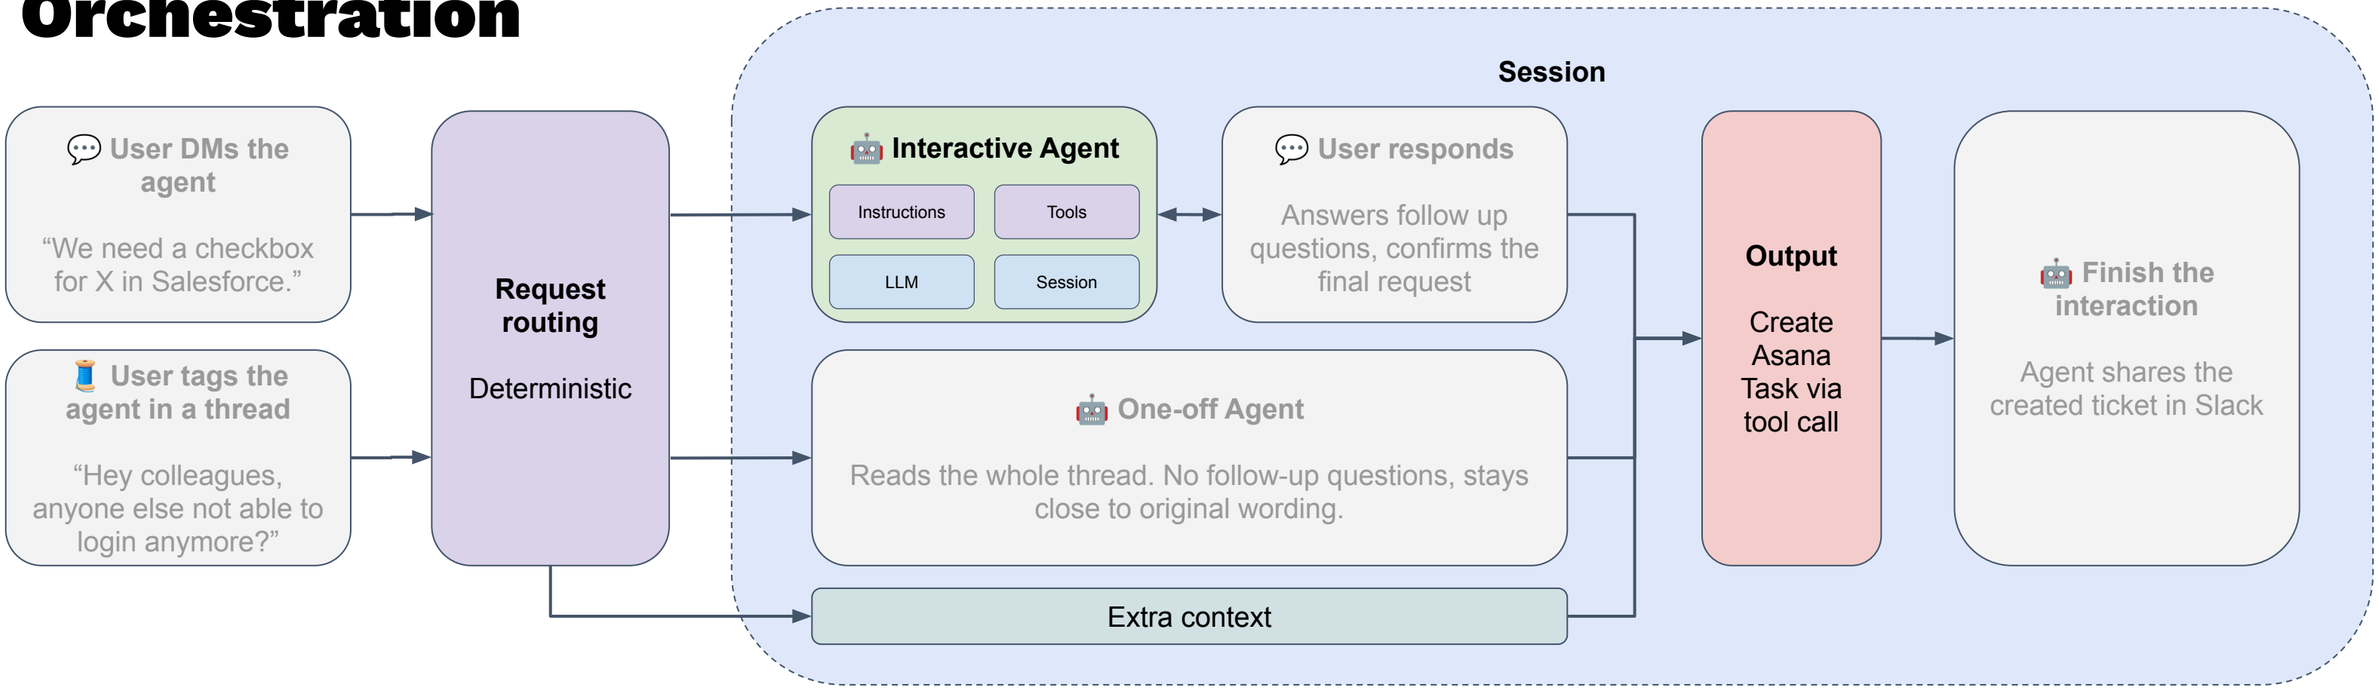

Current Limits

- Only access to pure message text (no attachments, etc.)
- No additional context (Asana, CRM, etc.)
- Limited use cases

Possible Expansions

- Duplicate check against open tickets
- More complex triage of request types
- Other use cases: basic Salesforce support, insights, etc.

Orchestration

Current Limits

- Complex instructions
- Sometimes inconsistent output (formatting, etc.)

Possible Expansions

Google ADK allows complex orchestration flows, combining deterministic and non-deterministic elements.

- More specialized sub-agents
- Additional tools
